Changes

- [Screen 1] – Inserted logo
 - To create an app identity
- [Screen 4] – Removed “go” and “share” buttons
 - “go” button is unnecessary as user can hit “return” on keyboard
 - “go” button was confusing, users thought it was a “directions” button
- [Screen 5] – Added a list of parking lots with status
 - Users told they would like to see how full the lot is while searching
- [Screen 6] – “i” button over pin
 - Users think that an “i” button close to the pin, to get more info, is more intuitive
